## Big Snow Storm

The long waited for snow storm came. It commenced Friday morning and continued until noon today and during that time thirty inches of snow fell. This morning the streets and sidewalks were impassable and the early riser had all he do could to break a path through the heavy snowfall.

Street Supervisor Compton was out early with his snow plow and by noon he had made the sidewalks passable, a work which was highly appreciated by our citizens.

It was the first heavy snow fall of the season and the storm is reported to be general all over the territory. At Hackberry four inches of snow fell and in the Little Colorado valley both rain and snow fell in abundance. In the Salt River valley good rains are reported. The storm came in good time for the stockmen as water was beginning to be needed on the ranges and the storm was of untold value to the stockmen.

The case attracts a great deal of attention in Winslow where the killing took place and a great many of the citizens have been summoned as witnesses. The attorneys for the prosecution are Paul Geary and T. G. Norris and for the defense E. M. Doe, J. E. Jones and R. M. Ling. ## RECEIVER'S SALE

The Anita Copper Mines and Smelter Sold to a Syndicate Who Will Develop Property.

On Tuesday J. W. Francis receiver of the Anita Copper company sold at private sale the property of that company. C. O. Robinson was the purchaser and the price paid was \$2,600, Mr. Robinson making the purchase for other parties, who will it is said further develop the mining property and who have every confidence that they will at a considerable depth develop a big body of copper ore. The former owners spent a great deal of money in machinery and developmentwork on the mine but not getting immediate returns the stockholders quit contributing and the mine closed down with the result of having the property placed in the hands of a receiver and sold at a fraction of the part of the money invested in the development of the property.

The sale included the smelter built at Williams several years ago. The mines are located about 45 miles north of Williams and near the Grand Canyon railroad. The trade from the mine which will employ under the new owners about forty men is tributary to Williams and it is hoped that the new syndicate will realize their expectations. The day following the sale Receiver Francis received a telegram from Boston presumably from the former owners offering \$3,000 for the mine. The offer came one day too late.

## Fine Flagstaff Sheep

The sheep display at the late fair was very good and a decided improvement on last year both as to numbers and quality. Mr. C. C. Hutchinson took the challenge premium for the best ram of any class over two years old. Edgar T. Smith's challenge ram Lamte winner was one of a herd of 3,000 ram lambs (ram boulllets) of a similar class which will be on sale as yearlings next season. Messrs. James Scott, Holbrook, Ariz., John Finlay, Seligman and Albert Jones, Williams, were the judges.—Arizona Republican.

## The Territorial Prison

There are 365 convicts in the Territorial penitentiary at present, which exceeds in number any year since the prison has been in Yuma. Superintendent Millay states that in spite of the large number, the guards are given comparatively no trouble by the prisoners. From eighteen to twenty guards are employed to preserve order.

As is generally known, all the work done within the walls is done by the prisoners, and many trades are successfully carried on. It has been found unprofitable by the territory to carry on any regular industry, as is so often done in other states.—Yuma Sun.

W. R. Johnson of Tolchoco was in town yesterday. No rain or snow had fallen at Canyon Diablo up till noon, when he left there.

## A New Forest Reserve

Word was received at the office of the governor yesterday of the establishment of a new forest reserve in this territory. It is the Baboquiviri reserve in the southeastern part of the county. It takes its name from the Baboquiviri mountains and extends irregularly along that range and Baboquiviri creek which washes the base of the range when there is water in it. That, however, is seldom. This range includes the famous Baboquiviri peak.—Phoenix Republican.
